

## Fairtree Protea Equity Long Short SNN Retail Hedge Fund

### Minimum Disclosure Document - Class 1

31 May 2018

#### Fund Profile

The fund is a South African long/short equity hedge fund with the objective of generating above-average returns by following a 'quantamental' investment approach, combining traditional fundamental analysis with quantitative investment techniques. The investment manager systematically identifies individual mispriced securities whilst ensuring sufficient diversification to guard against inappropriate risk concentration. The fund focuses on JSE-listed securities and has a net equity exposure of 35-70% at most times, with a maximum gross exposure of 200% (i.e. maximum 2x leverage).

#### Investment Strategy

The fund's core strategy is to be long undervalued equities and short overvalued equities, whilst ensuring that there is sufficient diversification to guard against inappropriate risk concentration. The equities are selected by following a 'quantamental' investment approach, combining traditional fundamental analysis with quantitative investment techniques, which assists the portfolio manager in avoiding behavioural biases as it relates to investment decision-making.

#### Portfolio Objective

The long-term objective of the fund is to compound investment returns, after all fees, at an above-average rate when compared to other equity funds (both active and passive), while avoiding deeply negative returns over any 12-month rolling period.

#### Sector Allocation

#### Asset Allocation

### Increase in NAV Attributable to Investors

|      | Jan   | Feb   | Mar   | Apr    | May    | Jun | Jul    | Aug    | Sep    | Oct   | Nov    | Dec   | Total |
|------|-------|-------|-------|--------|--------|-----|--------|--------|--------|-------|--------|-------|-------|

| 2018 | 3.00% | 4.92% | 0.46% | -0.42% | -0.23% |     |        |        |        |       |        |       | 7.86% |

\*The inception date for the portfolio is 1 July 2017. The portfolio has been transitioned under CISCA regulations on 1 July 2017 and has since been managed as a regulated product. The annualized total return is the average return earned by an investment each year over a given time period, since date of the launch of the fund. Actual annual figures are available from the manager on request. The highest and lowest 1 year returns represent the highest and lowest actual returns achieved during a 12 month rolling period year since the original launch date of the portfolio. The performance figures given show the yield on a Net Asset value ("NAV") basis. The yield figure is not a forecast. Performance is not guaranteed and investors should not accept it as representing expected future performance. Individual investor performance may differ as a result of initial fees, time of entry/actual investment date, date of reinvestment, and dividends withholding tax. Performance is calculated for a lump sum investment on a Net Asset Value basis. The performance figures are reported net of fees with income reinvested. Jean Pierre Verster took over as portfolio manager since inception of the fund.

### Risk Profile

|             |     |            |        |          |      |
|-------------|-----|------------|--------|----------|------|
| Risk Level: | Low | Low-Medium | Medium | Med-High | High |
|-------------|-----|------------|--------|----------|------|

The risk category shown is not guaranteed and may change over time. The lowest category does not mean the investment is risk free. There may be other special areas of risk relating to the investment including liquidity risk, credit risk, market risk, and settlement risk. Sanne Management Company (RF) (Pty) Ltd, ("the manager"), and the investment manager do not render financial advice. Our risk indicator does not imply that the portfolio is suitable for all types of investors. You are advised to consult your financial adviser.

### Portfolio Valuation & Transaction Cut-Off

Portfolios are valued monthly. The cut off time for processing investment subscription is 10:00am on the last day of the month prior to enable processing for investment on the first day of the next month.

### Total Expense Ratio

A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER's. Transaction Costs are a necessary cost in administering the financial product and impacts financial product returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of financial product, the investment decisions of the investment manager and the TER. The TER is reported excluding performance fees for the first six months of the portfolio. The Manager has applied its mind hereto and is of the view that any reporting of TER with performance fee at this stage may be inaccurate and potentially misleading to investors.

### Market Commentary

The fund ended the month down slightly, while the FTSE/JSE All-Share Index dropped by 3.5%. The market experienced a broad sell-off, with only six companies out of the Top 40 ending the month higher. Our Shorts and Bearish Options generated pleasing gains, while our Longs and Special Situations had a negative impact on performance.

On the Long side, almost all our holdings ended lower for the month, especially the shares of companies exposed to the domestic South African economy. Our largest gain was from a holding in the Chemicals sector, while exposure to the Building Materials sector was the largest detractor from performance.

On the Short side, almost all our holdings generated gains, with both the Retail and General Industrial sectors contributing most significantly. Our Bearish Options did what they are supposed to do when markets drop sharply, and generated meaningful gains for us during the month.

Our Special Situations detracted from performance, mostly due to the Naspers versus Tencent 'stub' trade moving against us. We continue to see significant potential upside in this trade, which also acts as a useful hedge against the so-called Variable Interest Entity (VIE) structure commonly employed by Chinese companies listed elsewhere. We do not believe that there is a significant risk to shareholders of Tencent's Hong Kong listed shares (Naspers included) due to exposure to the VIE structure, but it is a low-probability-high-impact tail risk that we prefer to hedge.

**Please Note:** The above commentary is based on reasonable assumptions and is not guaranteed to occur.

### Mandatory Disclosures

**Investment Manager:** Fairtree Capital (Pty) Ltd, **Registration Number:** 2004/033269/07 is an authorised Financial Services Provider (FSP25917) under the Financial Advisory and Intermediary Services Act (No.37 of 2002), to act in the capacity as investment manager. Collective Investment Schemes are generally medium- to long-term investments. The value of participatory interests (units) may go down as well as up. Past performance is not necessarily a guide to future performance. Collective investments are traded at ruling prices and can engage in scrip lending and borrowing. A schedule of fees, charges and maximum commissions, as well as a detailed description of how performance fees are calculated and applied, is available on request from Sanne Management Company (RF)(Pty) Ltd ("the Manager"). The Manager does not provide any guarantee in respect to the capital or the return of the portfolio. Excessive withdrawals from the portfolio may place the portfolio under liquidity pressure and in such circumstances, a process of ring-fencing of withdrawal instructions and managed pay-outs over time may be followed. Commission and incentives may be paid, and if so, are included in the overall costs. The Manager may close the portfolio to new investors in order to manage it efficiently according to its mandate. Prices are published daily on our website and local media. Additional information, including key investor information documents, minimum disclosure documents, as well as other information relating to the basis on which the manager undertakes to repurchase participatory interests offered to it, and the basis on which selling and repurchase prices will be calculated, is available, free of charge, on request from the Manager. The value of an investment is dependent on numerous factors which may include, but not limited to, share price fluctuations, interest and exchange rates and other economic factors. Where foreign investments are included in the portfolio, performance is further affected by uncertainties such as changes in government policy, political risks, tax risks, settlement risks, foreign exchange risks, and other legal or regulatory developments. The Manager ensures fair treatment of investors by not offering preferential fee or liquidity terms to any investor within the same strategy. The Manager is registered and approved by the Financial Sector Conduct Authority under CISCA. The Manager retains full legal responsibility for the portfolio. FirstRand Bank Limited, acting through the RMB Custody and Trustee Division, is the appointed trustee. Fairtree Capital (Pty) Limited, FSP No. 25917, is authorised under the Financial Advisory and Intermediary Services Act 37 of 2002 to render investment management services.
